

The shares held by _____ (current owner) at _____ (address of the property), certificate # _____ for _____ of a share are in good standing and all assessment fees are paid for 2021 (or if they are not paid up, I will let them know the balance). The billing for annual assessment fees come out in January every year and I do not see that there will be a price increase so it will be \$_____ for 2021. This share is equal to _____ miner inches of water and 1 miner inch of water is adequate to irrigate 1 acre.

I've attached the affidavit that will need to be completed and notarized if the original share certificate # _____ cannot be located to make the transfer to the new owners. If they have their original stock certificate, they can fill out the back of the stock certificate with the transfer information and have it notarized even though it just states to be a "witnessed signature". There is a \$75 transfer fee and each transfer has to be approved by the Corvallis Canal & Water Company board of directors. Their next meeting will be _____ (2nd Tuesday of the month). All documents and payment need to be available at that board meeting for a decision to be made on the transfer.

You can mail either the certificate or the affidavit along with the transfer fee payable to:
Corvallis Canal & Water Co.
P.O. Box 545
Corvallis, MT 59828
